Skills

- **Data Analysis:** Python – NumPy, Pandas, Matplotlib + Seaborn.
- **Database Management:** SQL (Joins, Sub queries), MS SQL Server, Data Modeling.
- **Data Visualization Tools:** Advanced MS Excel, Power BI, Tableau.
- **Analytical Abilities:** Data Cleaning, Exploratory Data Analysis (EDA), ETL, Insight Generation, Statistical Analysis, Critical Thinking.

Projects

Global Superstore Sales Performance Dashboard | Tableau

Feb 2026

- Analyzed 50,000+ rows of sales data across 7 regions, identifying top 3 profit-driving categories to evaluate sales, profit, and regional performance.
- Built interactive dashboards to visualize sales trends, product categories, and customer segments.
- Used filters and parameters to enable dynamic analysis by region and time.
- Identified top-performing categories and profit trends to support business insights.

Hospital Operations & Patient Analytics Dashboard | Power BI

March 2026

- Analyzed hospital dataset to track patient admissions, recovery status, and treatment outcomes.
- Created KPIs using DAX including Recovery Rate, Readmission Rate, and Patient Count.
- Designed interactive Power BI dashboards with filters for department and patient status.
- Generated insights on patient distribution and hospital workload trends.

Swiggy Sales Analysis | MS SQL Server

June 2026

- Analyzed Swiggy dataset to study orders, revenue, and top-performing restaurants across cities.
- Performed data cleaning and aggregation to identify peak order times, popular cuisines, and customer demand trends.
- Identified peak order times, high-demand cuisines, and city-wise performance to generate business insights.

Courses & Certifications

Data Analytics Masters | Udemy

Dec 2025 - March 2026

- Completed Course in data analysis, visualization, and business intelligence.
- Worked with tools such as Excel, SQL, Python, Tableau and Power BI.

Data Analyst with Python | Elysium Academy, Madurai.

Jan 2026 - March 2026

- Learned Python for data analysis using Pandas, NumPy, Seaborn and Matplotlib.
- Performed data cleaning, exploratory data analysis, ETL and visualization on datasets.
- Completed Industry-oriented training focused on end-to-end Data analytics lifecycle.
